

A box plot comparing the distribution of 'number' for two groups: WT (red) and KO (teal). The y-axis represents the 'number' and ranges from 0 to 10. The WT group shows a median around 1.5, with the interquartile range (IQR) spanning from approximately 0.5 to 2.5. The KO group shows a median around 2.5, with the IQR spanning from approximately 1.5 to 3.5. Both groups have whiskers extending to the minimum and maximum values, with individual data points plotted as dots.

Group	Min	Q1	Median	Q3	Max
WT	0.5	0.5	1.5	2.5	3.5
KO	1.5	1.5	2.5	3.5	4.5
