

Box plot showing the distribution of the number of cells per embryo for WT (red) and KO (cyan) groups. The y-axis represents the number of cells per embryo, ranging from 0 to 3. The WT group shows a median of approximately 1.0, while the KO group shows a median of approximately 0.5. The KO group has a significantly higher number of outliers compared to the WT group.

Group	Median	Q1	Q3	Min	Max	Outliers
WT	~1.0	~0.5	~1.5	~0.2	~1.8	None
KO	~0.5	~0.2	~1.0	~0.2	~1.2	~2.5
